

## Call for Presentations

Ladies and Gentlemen,

Techtextil is internationally THE platform for development and innovation over the whole range of technical textiles, functional apparel textiles and textile technologies.

From 21 to 24 June 2022 this leading international trade fair for technical textiles and nonwovens will be opening its doors at the Messe Frankfurt Fair & Exhibition Centre for trade visitors from the widest range of sectors. Along with its exhibitors' multifaceted presentations, Techtextil 2022 will once more be coming up with numerous special formats, including the Techtextil Forum.

As in 2019, the **Techtextil Forum** will be offering scope for interactive exchange between exhibitors and trade visitors, and between researchers/developers and users. Along with numerous specialist talks by experts from the most various areas of application, the Forum Programme will also include various discussion formats. In 2022 the Techtextil Forum will again be presented free of charge directly in the exhibition hall. In this way you will be in the immediate vicinity of our interested trade public and will also benefit from the fact that the presentations will be streamed resp. be available on demand.

In putting together the programme for the Techtextil Forum, we would like to involve as many players from the industry and research as possible. We therefore cordially invite you to submit your proposal for a presentation in the Techtextil Forum 2022.

Would you like to pass on a set task to the industry directly? Maybe you are offering a solution or looking to a solution in technical textiles? Would you like to present your innovative future vision to a broader trade public?

We shall be glad to receive your proposals until 16 February 2022. Please submit your proposed contribution in English online at <https://techtexsilforum2022.abstract-management.de>.

Please feel free to get in touch with us if you have any questions. We shall be glad to help you further.

With best wishes from Frankfurt,  
Messe Frankfurt Exhibition GmbH

Olaf Schmidt  
Vice President  
Textiles & Textile Technologies

Michael Jänecke  
Director  
Brand Management  
Technical Textiles & Textile Processing

## Your proposed presentation

The range of topics at the Techtexsil Forum will cover new developments, trends and potential areas of application.

The presentations shall consider the following aspects:

- any kind of technical textiles, nonwovens, yarns & fibres, functional-clothing textiles, e-textiles
- technologies and processing operations
- digitalization
- new products
- megatrends
- sustainability, circular economy, recycling & traceability

Please note the following topics for your submission for the Techtexsil Forum. Proposals for other topics will also be accepted in principle. Please justify the relevance of differing topics cogently.

1. Health (textiles in medicine and hygiene)
2. Interior
3. PPE (personal protection equipment and protection of objects)
4. Building textiles
5. (New) trends
6. Textiles for mobility/moving around
7. Sport and leisure

We would like to have short and very trenchant presentations on the above topics. The length of the talks is restricted to 15 to 20 minutes. After the talk there will be room for questions and discussions. The contents of the talks and discussions should be presented visually, using illustrations, graphics, etc.

All talks will be simultaneously translated into German or English. Different formats, such as workshops, round-table discussions etc., will only take place in English. Materials (e.g. presentation slides) must be available in English.
