#456 Natural fibres: For business that grows on trees.

In this world with dwindling resources, bio-based and recyclable fibres and materials aren't just growing, they're regenerating. We set the stage for this sector in Hall 12.0.

Materials manufacturers, textile producers, developers, representatives of research and development and decision-makers from the major industry applications all meet at Techtextil.

Natural fibres, bio-based materials and high-performance textile solutions are all in one place – this is where material innovators meet major application areas.

When high-tech materials meet smart processing, it creates additional business opportunities. And Texprocess is taking place alongside Techtextil, combining AI-powered processing technologies with yet more relevant customers.

That's what makes this the most important place for every exhibitor to be: to gain expertise, contacts and business opportunities. The result is the most important trade fair in the technical textile industry, across all materials and technologies.

Just another reason of thousands to look forward to tomorrow.

#900 Begin a beautiful business relationship or two. Or 100.

Exhibitors:
1,476 from **52** countries,
77 % from outside Germany.

Visitors:
- **32,483*** from **102** countries
- **63 %** from outside Germany
- **73 %** of visitors are top decision-makers
- **36 %** of visitors are interested in coated fabrics

Top 10 visitor nations:

1. Germany
2. Italy
3. France
4. Turkey
5. The Netherlands
6. Belgium
7. Spain
8. Great Britain
9. Poland
10. Switzerland

*Includes visitors to Texprocess

#47 Find exactly the right fit.

Do you have an innovation but lack a distribution network? Have an idea but no connections? At Techtextil you'll find someone who's a match for you.

- Research outcomes and projects by world-famous institutes and universities will find an audience.
- New developments will be premiered, and find partners to take them to market.
- The preliminary production stages from Techtextil will find precision processing technologies at Texprocess.
- Manufacturers will find buyers, buyers will find suppliers.
- Textile innovations will find the technological expertise to become a reality that's available worldwide.

It's no coincidence that 90 % of all visitors to Texprocess also visit Techtextil.

#826 View the whole breadth of industrial applications.

There's no textile idea you can't find at Techtextil and Texprocess.

There's an amazing abundance of innovations, coming from very varied research and development departments. To showcase all this clearly, we've divided it up into 12 application areas.

#1811 Take a giant leap into the future.

State of the art, cutting-edge, trailblazing – call it what you want. If you're looking for the very latest in our industry, then the innovations here will grant you a glimpse into the future of textiles – across all our product groups:

- Research, Education and Industry Services
- Textile Production Technology
- Fibres and Yarns
- Woven Fabrics, Laid Webs, Braidings, Knitted Fabrics
- Nonwovens
- Coated Textiles
- Composites
- Bondtec
- Textile Chemicals and Dyes
- Performance Apparel Textiles

#1221 Synthetic and natural as perfect partners.

The **textile value chain** starts with raw materials, yarns and threads. Their quality determines the quality of the items made from them. **Whether they're heat-resistant, conductive, especially lightweight** or **biodegradable** – the properties of technical textiles are established in their yarns and threads.

Very specific requirements can be met by combining natural and synthetic materials in innovative ways. These form the basis for many applications in **mobility, medicine, construction, protective clothing** and more.

The leading manufacturers and users of our **Fibres and Yarns** meet up here at Techtextil. This is where we combine **material expertise** with a wide variety of uses to offer an ideal platform for exchange and discussions between the worlds of **research, industry and application**.

Here's a small selection of exhibitors at Techtextil 2026:

- **Toray International Europe GmbH / Toray Textiles Europe Ltd.**
- **Indorama Ventures**
- **Aditya Birla Group**
- **Far Eastern New Century Corporation**
- **HS Hyosung Advanced Materials**
- **Sasa Polyester Sanayi A.S.**
- **The Lycra Company**
- **Kuraray Europe GmbH**
- **Aquafil S.p.A.**
- **Aksa Akrilik Kimya Sanayi A.S.**
- **Teijin Frontier Co. Ltd.**
- **Invista Textiles**

#84 Natural innovators.

Demand for **high-performance, environmentally friendly** materials is growing year on year. Your customers want them, the law requires them.

So it's only natural for us to focus more on this growing, regenerative area at Techtextil. **We are therefore not only offering a platform for man-made fibres but also opening up to bio-based fibres – alongside many innovative natural fibres.**

With their particular **functional properties** (warm, insulating, water repellent, antibacterial, stabilising and more), they offer plenty of possibilities for textile engineers.

In 2026, over 100 exhibitors offered Nature Performance solutions, including over 30 from Fibres & Yarns: These included Abacell, Barnet Europe, Basaltex, CORDENKA, Fibre e Tessuti Speciali, Karsu Tekstil, Longcell Europe, Oceansafe, Senbis and Südwolle Group.

Most Nature Performance exhibitors are located in Hall 12. Special labelling in the online exhibitor and product search and on the stands at the trade fair helps increase their visibility.

#678 Recycled, but brand new: innovative materials in Hall 12.0.

Fibres and yarns made from recycled materials form the basis for textiles produced from reclaimed natural or synthetic fibres. They come from manufacturing waste or used products, and reusing these materials helps conserve resources, avoid waste, and support the circular economy.

Achieve an easy overview at **Recycled Performance** in Hall 12.0. Special labelling in the online exhibitor search and on the trade fair stands themselves helps increase their visibility further.

These are just some of the exhibitors who attended in 2026:

- **ANTEX**
- **Aquafil**
- **Brilen Tech**
- **Freudenberg Performance Materials**
- **Neuaustima**
- **Nilit**
- **Korteks Mensucat**
- **Radici Yarn**
- **Teijin Group**
- **The Lycra Company**

#380 Transform your stand. And avoid a headache.

Various options for your professional presence:

- **Individual stand area** with your own stand.

- **Complete stand package** comprising space, stand and marketing materials.
- Everything's ready and waiting when you arrive. You'll be highly visible, with no extra organisation needed. Costs are transparent too!
- An attractive setting for both planned and chance encounters with top trade fair attendees at your stand.
- A professional trade fair presence in quality surroundings with premium providers.

See here for the price of your individual stand area.

See here for the price of a complete stand package.

Book by 30 November 2026 to secure your early bird price!

#158 Stand up for sustainability.

Hall 12.0 offers exhibitors of Nature Performance materials the chance to book an attractive stand package and grab their target groups' attention.

ALL-INCLUSIVE PRICE:

6 sqm	**–**	**€5,185**
12 sqm	**–**	**€7,485**

All prices include environmental contribution of €4.50/sqm and AUMA contribution (Association of the German Trade Fair Industry) of €0.80/sqm, plus a mandatory media package worth €985, **but not VAT**.

See here for details of the **Nature Performance** stand package.

#234 The easiest way to access global decision makers…

Focus:
Nature Performance and Recycled Performance

#6 The perfect infrastructure makes Techtextil accessible from everywhere.

- Frankfurt is an international trade fair location at the heart of Europe.
- This is the established textile industry meeting place.
- It's easy to reach by train, car or plane.
- This city has short journey times and perfect infrastructure.
- The location is 15 minutes from the airport, with flights to 270 destinations and passengers from over 100 countries.
